PROFESSIONAL WORK EXPERIENCE

IT Cybersecurity Specialist (SysAdmin / InfoSec)

Defense Information Systems Agency (DISA) – Joint Service Provider (JSP)

July 2024 – Present

- VDI & VMware Support: Build, patch, and test Virtual Desktop Infrastructure (VDI) golden images using VMware vSphere and VMware Horizon for in-house enterprise users; monitor desktop pools for stability.
- Active Directory & User Profile Administration: Perform routine Active Directory (AD) maintenance, user account administration, and directory object updates; troubleshoot and rebuild stuck or corrupted user profiles to restore end-user access.
- STIG Checks & Security Compliance: Conduct scheduled Security Technical Implementation Guide (STIG) checks on virtual machine baselines; document findings and support technical teams in remediating identified security gaps.

- System Operations & Support: Monitor virtual machine performance and desktop pool health to support system availability and minimize disruption for enterprise users.
- ISSO Support: Assist Information System Security Officers (ISSOs) with compliance tracking and updating security documentation.

Cybersecurity Analyst

Cybersecurity & Infrastructure Security Agency (CISA) *(Remote)*

June 2023 – August 2023

- Vulnerability Analysis: Supported automated security testing and attack surface reviews to help identify software vulnerabilities and risk areas.

Data Entry Operator II – Tactical Aerostat System (TAS) Control Center

Peraton – *Newport News, VA*

September 2019 – February 2022

- Operations & System Documentation: Updated Standard Operating Procedures (SOPs) and training materials; managed tactical operational databases using InforEAM and produced daily reporting for command decision-making.
- Inter-Agency Coordination: Managed multi-site operational communications and coordinated airspace usage directly with the Federal Aviation Administration (FAA).
